INFORMATION SCIENCES

AN INTERNATIONAL JOURNAL

Volume Contents for 1999

Volume 113, Numbers 1–2, 1999

M. DELGADO, C.J. MANTAS AND C. MORAGA
A fuzzy rule based backpropagation method for training binary multilayer perceptrons 1

M.J. PATYRA AND J. GRANTNER
Hardware implementations of digital fuzzy logic controllers 19

F. BERGADANO, A. PULIAFITO, S. RICCOBENE, G. RUFFO AND L. VITA
Java-based and secure learning agents for information retrieval in distributed systems 55

I.R. GOODMAN
Homomorphic-like random set representations for fuzzy logic models using exponentiation with applications to data fusion 85

G. GONG, S.-C. CHENG AND J.N. MORDESON
Vitamin D receptor gene polymorphism affects bone mineral density: An analysis by fuzzy mathematics. 113

S.-P. SHIEH AND C.-T. LIN
Auditing user queries in dynamic statistical databases 131

C.-P. CHANG, J.-N. WANG AND L.-H. HSU
Topological properties of twisted cube 147

Volume 113, Numbers 3–4, 1999

Y.-C. HO
An explanation of ordinal optimization: Soft computing for hard problems 169

J. C. Lusth and B. Dixon
A characterization of important algorithms for quantum-dot cellular automata 193

T. Okazaki, K. Inoue, A. Ito and Y. Wang
A note on two-dimensional probabilistic Turing machines 205

O. Monchi and J.G. Taylor
A hard wired model of coupled frontal working memories for various tasks 221

Y.D. Lee, B.H. Lee and H.G. Kim
An evolutionary approach for time optimal trajectory planning of a robotic manipulator 245

X.-D. Dong, C.B. Soh, E. Gunawan and L.-Z. Tang
On groups of complex integers used as QAM signals 261

M. Kryszkiewicz
Rules in incomplete information systems 271

M.S. Sunitha and A. Vijayakumar
A characterization of fuzzy trees 293

H.-M. Lee
Generalization of the group decision making using fuzzy sets theory for evaluating the rate of aggregative risk in software development 301

G. Naval, T. Brezmes and C. Bertoluzza
A generalized theory of preference 313

D.S. Malik, J.N. Mordeson and M.K. Sen
Minimization of fuzzy finite automata 323

Volume 114, Numbers 1–4, 1999

F. Najjar and Y. Slimani
Extension of the one-shot semijoin strategy to minimize data transmission cost in distributed query processing 1

K. Shanmukh, C.N.S. Ganesh Murthy and Y.V. Venkatesh
Applications of self-organization networks spatially isomorphic to patterns 23

C. Gaibisso, E. Nardelli and G. Proietti
Intersection reporting on two collections of disjoint sets 41

D. Van Heule, A. Hoogewijs and N. Slaats
The non-definedness notion in expert systems 53

B. PAYRI
Knowledge base improvement through genetic algorithms 63

G. GIM AND T. WHALEN
Logical second order models: Achieving synergy between computer power and human reason 81

W.-G. TZENG AND G.-H. KING
Three-quarter approximation for the number of unused colors in graph coloring 105

C.-Y. I. LIN AND C.-S. HO
Generating domain-specific methodical knowledge for requirement analysis based on methodology ontology 127

M. LEVENE AND G. LOIZOU
A probabilistic approach to navigation in Hypertext 165

J.K. CHEN AND Y.H. CHIN
A concurrency control algorithm for nearest neighbor query 187

XU YANG, QIN KEYUN, LIU JUN AND SONG ZHENMING
L-valued propositional logic L_{vpl} 205

W.-Y. KIM, K.-Y. WHANG, Y.-K. LEE AND S.-W. KIM
A recovery method supporting user-interactive undo in database management systems 237

W.C. STIRLING AND M.A. GOODRICH
Satisficing games 255

L. RODRÍGUEZ, H. OGATA AND Y. YANO
TVOO: A Temporal Versioned Object-Oriented data model 281

Volume 115, Numbers 1–4, 1999

B. ROCHE, T.M. MCGINNITY, L.P. MAGUIRE AND L.J. MCDAID
Modeling architectures for VLSI implementations of fuzzy logic systems 1

W.K. LAI, M.C. LIOU, D.R. SHIU AND W.J. HSIAO
On a multicast resequencer for ATM networks 11

M. LÓPEZ DÍAZ AND M.A. GIL
An extension of Fubini's theorem for fuzzy random variables 29

J.G. STEVENS
On the construction of state diagrams for cellular automata with additive rules 43

T. Okazaki, K. Inoue, A. Ito and Y. Wang
Closure properties of the classes of sets recognized by space-bounded two-dimensional probabilistic Turing machines ... 61

D.H. Hong and C. Kim
A note on similarity measures between vague sets and between elements ... 83

K.H. Pribram
Quantum holography: Is it relevant to brain function? ... 97

R.-S. Chang
Jump number maximization for proper interval graphs and series–parallel graphs ... 103

E. Mäkinen
Generating random binary trees – A survey ... 123

A. Yazici and D. Cibiceli
An access structure for similarity-based fuzzy databases ... 137

T. Haga
An application of the (p, q)-logic to the synthesis of the p-valued logical networks and the $s - (p, q)$-logical completeness ... 165

J.L. Guerrero-Cusumano
Multivariate exponential families and the Taguchi loss function ... 187

L. Chen, D.H. Cooley and J. Zhang
The equivalence between two definitions of digital surfaces ... 201

N.B. Waite
A real-time system-adapted anomaly detector ... 221

S. Banerjee, D.P. Mukherjee and D.D. Majumdar
Fuzzy c-means approach to tissue classification in multimodal medical imaging ... 261

Volume 116, Number 1, 1999

Special Issue: Logical Methods for Computational Intelligence

G. Antoniou and N.V. Murray
Logical methods for computational intelligence ... 1
(*Guest Editorial*)

D. Fehrer and H. Horacek
Presenting inequations in mathematical proofs. ... 3

E. Lamma, P. Mello, M. Milano and F. Riguzzi
Integrating induction and abduction in logic programming. ... 25

D. BILLINGTON
Proving quantified literals in Defeasible Logic 55

R.D. DORMER AND C. MACNISH
The PAC-learnability of planning algorithms: Investigating simple planning domains 83

E. MÄKINEN
Generating random binary trees – A survey 123

A. YAZICI AND D. CIBICELI
An access structure for similarity-based fuzzy databases 137

T. HAGA
An application of the (p, q)-logic to the synthesis of the p-valued logical networks and the $s - (p, q)$-logical completeness 165

J.L. GUERRERO-CUSUMANO
Multivariate exponential families and the Taguchi loss function . . . 187

L. CHEN, D.H. COOLEY AND J. ZHANG
The equivalence between two definitions of digital surfaces 201

N.B. WAITE
A real-time system-adapted anomaly detector 221

S. BANERJEE, D.P. MUKHERJEE AND D.D. MAJUMDAR
Fuzzy c-means approach to tissue classification in multimodal medical imaging 261

Volume 116, Numbers 2–4, 1999

W.J. FREEMAN
Comparison of brain models for active vs. passive perception 97

C.-Y. LEE, Y.-S. YEH, D.-J. CHEN AND K.-L. KU
A probability model for reconstructing secret sharing under the internet environment 109

A. De SANTIS AND B. MASUCCI
A lower bound on the encoding length in lossy transmission. 129

S. TEJOMURTULA AND S. KAK
Inverse kinematics in robotics using neural networks 147

S. ASOGAWA AND N. AKAMATSU
A new model for the source of vowels based on the vortex sound . . 165

H. YING
Analytical structure of the typical fuzzy controllers employing trapezoidal input fuzzy sets and nonlinear control rules 177

R. BADARD
Expressions on a fuzzy pretopological substratum 205

B. BOUCHON-MEUNIER AND V. KREINOVICH
Fuzzy modus ponens as a calculus of logical modifiers: Towards Zadeh's vision of implication calculus 219

P. PERRIN AND F. PETRY
An information-theoretic based model for large-scale contextual text processing 229

Y.B. JUN, X.L. XIN AND D.S. LEE
On topological BCI-algebras 253

Volume 117, Numbers 1–2, 1999

J.S. ALBUS
The engineering of mind 1

L. WEBSTER II, J.-G. CHEN, S.S. TAN, C. WATSON AND A. de KORVIN
Vadidation of authentic reasoning expert systems 19

G.-J. WANG
On the logic foundation of fuzzy reasoning 47

M.-S. LIN, M.-S. CHANG AND D.-J. CHEN
Efficient algorithms for reliability analysis of distributed computing systems 89

D. TANIAR AND J.W. RAHAYA
Performance analysis of parallelization models for path expression queries 107

Announcement: 5th Joint Conference on Information Sciences (JCIS 2000) 143

Volume 117, Numbers 3–4, 1999

T. YANG
Computational verb systems: modeling with verbs and applications 147

A.K. GHOSE, G. ANTONIOU, R.G. GOEBEL AND A. SATTAR
Connections between default reasoning and partial constraint satisfaction 177

S. CHANAS AND P. ZIELIŃSKI
Ranking fuzzy interval numbers in the setting of random sets – further results 191

I. KWAN AND Q. LI
A hybrid approach to convert relational schema to object-oriented schema 201

Q. LI AND R.K. WONG
Multifaceted object modeling with roles: a comprehensive approach 243

L. QU AND R. SUN
A synergetic approach to genetic algorithms for solving traveling salesman problem 267

Volume 118, Numbers 1–4, 1999

J.-H. HORNG
Neural adaptive tracking control of a DC motor 1

Z. CHEN, H. ZEDAN, A. CAU AND H. YANG
A wide-spectrum language for object-based development of real-time systems 15

P.J. CHENG AND W.P. YANG
A new content-based access method for video databases. 37

R. ALHAJJ AND F. POLAT
Using object-oriented materialized views to answer selection-based complex queries 75

J. LEE, N.-L. XUE, K.-H. HSU AND S.J. YANG
Modeling imprecise requirements with fuzzy objects. 101

G. BUTCHER AND C. SCHROEDER
A model for addressing software volatility in new system development 121

M. FUKETA, K. MORITA, S. LEE AND J.-i. AOE
Efficient controlling of parsing-stack operation for LR parsers 145

B.B. CHAUDHURI AND A. ROSENFELD
A modified Hausdorff distance between fuzzy sets 159

G. de COOMAN AND D. AEYELS
Supremum preserving upper probabilities 173

S.B. ENCHEVA AND G.D. COHEN
On linear projective codes which satisfy the chain condition 213

T.-M. HSIEH, Y.-S. YEH, C.-H. LIN AND S.-H. TUAN
One-way hash functions with changeable parameters 223

P. CHAUDHURI
A self-stabilizing algorithm for minimum-depth search of graphs . . 241

L. SHEN, H. SHEN AND L. CHENG
New algorithms for efficient mining of association rules 251

M.C. PARDO
Nested models for categorical data 269

Volume 119, Numbers 1–2, 1999

S. WALCZAK AND T. SINCICH
A comparative analysis of regression and neural networks for university admissions 1

M.S. OBAIDAT, C. LEE, B. SADOUN AND D. NELSON
Estimation of pitch period of speech signal using a new dyadic wavelet algorithm 21

W.-N. TSAI AND Y.-B. LIN
A performance study of CDPD 41

D.T. HOANG, P.M. LONG AND J.S. VITTER
Dictionary selection using partial matching 57

B.J. MACLENNAN
Field computation in natural and artificial intelligence 73

J.V. HANSEN
Combining predictors: comparison of five meta machine learning methods 91

H.-K. CHANG AND S.-M. YUAN
Minimal cost replicated file system with an availability constraint . . 107

B.-F. WANG, J.-N. TSAI AND Y.-C. CHUANG
The lowest common ancestor problem on a tree with an unfixed root 125

Volume 119, Numbers 3–4, 1999

Special Issue: Relational methods in Computer Science

A. JAOUA AND G. SCHMIDT
Editorial 131

B. MÖLLER
Calculating with acyclic and cyclic lists 135

R. BERGHAMMER
Combining relational calculus and the Dijkstra–Gries method for deriving relational programs 155

M. MARX
Relation algebras can tile 173

C. HATTENSPERGER AND P. KEMPF
Towards a formal framework for heterogeneous relation algebra 193

He JIFENG AND C.A.R. HOARE
Linking theories in probabilistic programming 205

S. BEN YAHIA, H. OUNALLI AND A. JAOUA
An extension of classical functional dependency: dynamic fuzzy functional dependency 219

Y. KAWAHARA, H. FURUSAWA AND M. MORI
Categorical representation theorems of fuzzy relations 235

W. KAHL
Relational matching for graphical calculi of relations 253

J. DESHARNAIS
Monomorphic characterization of n-ary direct products 275

Y. MIZOGUCHI
Properties of graphs preserved by relational graph rewritings 289

M. WINTER
A relation algebraic approach to Interaction Categories 301

Volume 120, Numbers 1–4, 1999

B. SHU AND S. KAK
A neural network-based intelligent metasearch engine 1

Y. LIU AND G. CHEN
Optimal parameters design of oilfield surface pipeline systems using fuzzy models 13

Y. SAYGN, Ö. ULUSOY AND A. YAZC
Dealing with fuzziness in active mobile database systems 23

M.B. GORZALCZANY AND Z. PIASTA
Neuro-fuzzy approach versus rough-set inspired methodology for intelligent decision support 45

M.B. GORZALCZANY
On some idea of a neuro-fuzzy controller 69

N.N. KARNIK AND J.M. MENDEL
Applications of type-2 fuzzy logic systems to forecasting of time-series 89

C. Blundo and A. Cresti
Unconditional secure conference key distribution schemes with disenrollment capability 113

Y.-M. Tseng and J.-K. Jan
A novel ID-based group signature 131

D.J. Chen and P.Y. Chang
An efficient multipath routing for distributed computing systems with data replication 143

L. Wu and P.K. Varshney
Performance analysis of CSMA and BTMA protocols in multihop networks. (I). Single channel case 159

L. Wu and P.K. Varshney
Performance analysis of CSMA and BTMA protocols in multihop networks. (II). Multiple channel case 179

X. Lin, Y. Li and C.-P. Tsang
Applying on-line bitmap indexing to reduce counting costs in mining association rules 197

Y. Pan and K. Li
Constant-time algorithm for computing the Euclidean distance maps of binary images on 2D meshes with reconfigurable buses 209

B. Han and S.-J. Lee
A genetic algorithm approach to measurement prescription in fault diagnosis 223

H.-C. Wu
The central limit theorems for fuzzy random variables 239

M. Salicrú and P. Sánchez
Pseudocontinuity in hierarchical classifications 257

Volume 121, Numbers 1–2, 1999

W.-P. Lee
Evolving complex robot behaviors 1

L. Chen, G. Chen and Y.-W. Lee
Fuzzy modeling and adaptive control of uncertain chaotic systems 27

T. Yang
Computational verb systems: averbs and adverbials as modifiers of verbs 39

C.-H. HSIEH AND S.-H. CHEN
A model and algorithm of fuzzy product positioning 61

N. CHAUDHRY, J. MOYNE AND E.A. RUNDENSTEINER
An extended database design methodology for uncertain data management 83

K. CHEN AND Z. CHEN
Static analysis of life and death in the game of Go 113

S. BODJANOVA
Exploratory analysis of empirical frequency distributions based on partition entropy 135

D. DENNEBERG AND M. GRABISCH
Interaction transform of set functions over a finite set 149

Volume 121, Numbers 3–4, 1999

P. SALMELA, M. LEHTOKANGAS AND J. SAARINEN
Neural network based digit recognition system for voice dialling in noisy environments 171

R.D. BRANDT AND F. LIN
Adaptive interaction and its application to neural networks 201

P.-H. SUI AND S.-D. WANG
Fault-tolerant wormhole routing in two-dimensional mesh networks with convex faults 217

J.C. CUBERO, J.M. MEDINA, O. PONS AND M.A. VILA
Data summarization in relational databases through fuzzy dependencies 233

R.R. YAGER
Modeling uncertainty using partial information 271

I.R. GOODMAN AND H.T. NGUYEN
Probability updating using second order probabilities and conditional event algebra 295

B. HAN, S.-J. LEE AND H.-T. YANG
Comments on the theory of measurement in diagnosis from first principles 349

J.T.L. WANG, K. ZHANG AND C.-Y. CHANG
Identifying approximately common substructures in trees based on a restricted edit distance 367
